EXPERIENCE

October 2022 – Current

Team Member, Grill'd Kenmore

Working in a widely popular restaurant that has sold up to two-hundred burgers an hour, specializing in customer service, particularly at the register and on floor. Completed the Responsible Service of Alcohol certificate and have also completed the Certificate III in Hospitality

October 2024 – January 2025

Customer Solutions Specialist, Probe CX

Took incoming calls for Probe CX which is contracted by the ATO to provide guidance on tax returns, payments, refunds, and lodgements. Ensured the accuracy of taxpayer information to maintain compliance with ATO guidelines. Resolved issues such as incorrect details, delayed refunds, or difficulties accessing online ATO services.

REFERENCES

Michael Tyshing

Teacher, TAFE Queensland

Mr. Tyshing is the teacher that graded my final assessment for the certificate IV in cybersecurity, which covered a cooperative team-centred evaluation of an organization's incident response as well as the TryHackMe Red Team Capstone challenge. Mr. Tyshing is contactable at michael.teach.tafe@gmail.com.

Alexander Godby

Team Leader, Grill'd Kenmore

Alex is a team leader at Grill'd, and is often my shift manager, meaning he is the one who ensures every team member at Grill'd meets customer and business expectations for safety and . Alex is contactable at apg2505@gmail.com.

SKILLS

- Cloud Management
- Penetration Testing
- Python Programming
- Server/Hypervisor Configuration
- Network Security Analysis
- Incident Response Analysis
- Enterprise Network Infrastructure
- Collaboration in the ICT Industry
- Linux System Administration

INTERESTS

Linux RICEing – In my free time I like configuring personal Linux systems, specifically Arch or Debian to have aesthetically pleasing UI and controls using window managers such as 'i3wm' or 'bspwm' and custom terminal emulators like 'urxvt' and 'coolretroterm'. This helped me develop my understanding of the Linux system, because a large amount of these configurations require deep dives into the file system of the operating system.
